(August 2024 – October 2024)

WEB DEVELOPMENT INTERN

Duration: 3 Months

Location: Articsol Software House |
Mingora, Swat

- Built responsive web pages using HTML, CSS, JavaScript, PHP, and jQuery
- Used SQL databases to store and get data
- Worked with team members to improve user experience on websites
- Learned and practiced both front-end and back-end development to make websites work better and look cleaner

Personal Profile

Junior Web Developer with basic skills in HTML, CSS, jQuery, PHP, and database management, learned during a 3-month internship at Articsol Software House in Mingora, Swat. I have experience building responsive and easy-to-use websites that work well and look clean. I'm passionate about learning more, working with a team, and helping build smart, user-focused web solutions. I'm excited to grow as a full-stack developer and create websites that make a real difference.
